

Wristbands & Labels Catalogue

PDC HEALTHCARE

PDC Healthcare has been a trusted partner to healthcare organisations for more than 60 years, providing superior identification solutions for the safe and efficient management of patients. While we've refreshed our brand and visual identity, our company's founding principles of superior service, quality and innovation remain stronger than ever!

Positive Identification is the key to patient safety.

Positive patient identification provides the foundation for patient safety through the systematic prevention of manual errors. It has an effect on virtually every aspect of clinical care:

- The patient experience
- The efficiency and convenience of the patient care process
- The satisfaction of nurses, physicians and staff

These outcomes can all be linked to one thing: the quality of your identification solution. PDC Healthcare offers the most extensive selection of wristband and label solutions in healthcare to help protect patients and help improve clinical outcomes at critical points during the patient care process.

More hospitals trust PDC Healthcare products to accurately identify, track and connect their patients to all major hospital functions—from admissions to discharge. Designed with both patient and caregiver in mind, our products help improve efficiencies, while saving time and resources so caregivers can spend more time on patient care.

Our products are also designed and tested to high medical-grade quality standards for maximum safety, strength and durability (see p. 6). Each product is born from thousands of hours of rigorous research and testing to provide the most reliable and highest performing products available.

SERVICE YOU CAN COUNT ON. EASY ORDERING OPTIONS.

As People ID experts with over 60 years of experience in healthcare, we understand the business challenges of today's healthcare organisations like no other company.

Our customers receive expert advice, support and service from our team of experts. Our integrated Customer Service and Account Management Team provide 100% customer satisfaction—before, during and after your order.

Through multiple ordering options, PDC Healthcare is fully accessible to our clients and always open for business.

Customer Service

Your dedicated PDC Healthcare Customer Service representative will handle every stage of your ordering process knowledgeably, efficiently and courteously.

A PASSION FOR PATIENT SAFETY

With as many as one million people injured from errors during hospital treatment each year,* patient safety continues to be among one of the healthcare industry's top priorities. PDC Healthcare's positive identification solutions help healthcare institutions protect patients, reduce risk and adopt best practices to achieve compliance with important regulations, as listed below. In fact, the top-rated and safest hospitals choose and rely on PDC Healthcare products and services.**

■ The Joint Commission International*** Patient Safety Goals:

Goal 1 Identify patients correctly

Goal 2 Improve effective communication

Goal 3 Improve the safety of high-alert medications

Goal 4 Ensure correct-site, correct-procedure, correct-patient surgery

Goal 6 Reduce the risk of patient harm resulting from falls

■ "World Health Organisation" (WHO) Patient Safety Solutions****:

• Solution 2: Patient identification

• Solution 3: Communication during patient hand-overs

■ The "European Council" Recommendations on Patient Safety

■ The "National Patient Safety Agency" (England) Safer Practice Notice

■ The "Haute Autorité de Santé – HAS" (France) certification manual V2010 for hospitals

■ The "Ministero della salute" (Italy) publication on the clinical risk management

■ The "Department of Health" (Australia) patient safety indicators

■ The "Department of Health" (Hong Kong) recommendations to improve patient safety and reduce medical errors

■ Food and Drug Administration (FDA) for patient identification

■ American Health Association (AHA) to reduce the risk of lost or transferred data

Identification solutions that support you

You can't deliver patient care safely and effectively without a system in place that provides accurate and timely identification. PDC Healthcare products reach every touch point in the delivery of care—from admissions to discharge. We continue to innovate with new solutions for all major areas of healthcare, including:

- Patient identification management
- Patient safety & privacy management
- Electronic health record (EHR)
- Bar code point-of-care
- Blood administration
- Specimen collection & management
- Computerised physician order entry (CPOE)
- Patient alert standardisation
- Visitor & vendor management
- Patient flow management
- Automated management of medication guides

****WHO – Patient Safety Solutions, May 2007

THE PATIENT SAFETY PROGRAM

The Patient Safety Program is a set of processes and tools that guides you to implement a working identification system that will allow you to check the identity of patients and match the correct patient with the correct care.

The Patient Safety Education System is organised in different modules, each one dealing with a hospital ward. There is also a "Patient identification improvement pack", designed to address areas of concerns and improve the identification system in every area of the hospital.

The admissions department module 1

How to implement the identification process in the admissions department. Which data is relevant and how to apply them correctly on the identification wristband.

The emergency department module 2

How to implement the identification process in the emergency department. Which data is relevant and how to conduct triage through colour-coded wristbands.

The maternity department module 3

How to implement the identification process in the maternity department and how to match the right mother with the right baby. Which processes and precautions should be taken before and after the birth.

The wards module 4

How to implement the identification process in hospital wards. How to deal with patient identification during standard procedures and in case of identification issues.

The blood bank module 5

How to implement the identification process in the blood bank. How to match the right blood with the right patient, ensuring maximum safety throughout the blood transfusion process.

The morgue module 6

How to implement the identification process in the mortuary. ID advice for employees working with the deceased who need to ensure ID measures are in place, while offering reassurance and sensitivity to all parties involved.

Colour coded wristbands module A

How to implement a colour coding system. What kind of highly visible, colour-specific identification are used to warn caregivers of special precautions.

Communication module B

How to implement a communication flow in the hospital for all who are concerned. How to communicate with patients and medical staff to improve patient identification processes.

QUALITY PATIENT CARE BEGINS WITH A WRISTBAND AND LABEL!

The wristband and label are the only items that remain with a patient throughout his/her hospital stay, connecting the patient to all major hospital departments.

The right wristband and label media can determine the success or failure of your patient ID system. Don't risk patient safety by using low quality ID products, or products not designed for healthcare application.

Delivering medical grade quality, PDC Healthcare media provide superior:

Safety & security with multiple closure options and tamper-evident material that prevents the transfer of wristbands, while meeting critical regulatory compliances.

Printing performance to facilitate jam-free printing through smooth and seamless feedability—every time—while prolonging the print head.

Compatibility with each unique application products which are designed to meet specific environmental requirements (NICU, laboratory, long-term care, x-ray, etc.).

Workflow efficiency
Streamline steps at point-of-care, providing convenience for caregivers so they can focus more time on caring for their patients.

Scan reliability to deliver consistently accurate scan rates for positive patient identification and tracking.

Selection of wristband sizes to fit all shapes and sizes of patients, from the smallest newborn babies to the largest adults.

Durability to stand up to the test of time and maintain effectiveness throughout the patient's full stay.

Resistance to common fluids including 70% Isopropyl alcohol, alkaline detergent, hand lotion, hand sanitizer and iodine.

Comfort with smooth, soft materials that have contoured edges that are safe and comfortable against even the most delicate patients' skin.

All our bands are **latex-free** and **phthalate-free**

Wristband solutions

When it comes to patient safety, positive patient identification is critical. You can't deliver patient care safely and effectively without a wristband system in place that provides accurate identification. Positive identification affects virtually every aspect of clinical care: the patient experience, the efficiency and accuracy of the care process, the satisfaction of nurses, physicians and staff. These outcomes can all be linked to your identification solution.

With 60 years of experience, PDC Healthcare provides the largest selection of accurate, reliable and easy-to-use Patient Identification Wristbands for every applicable hospital department and application. Our wristband solutions accurately identify patients, comply with state colour code standardization initiatives, match the right patient to the right blood, match the right mother and baby and streamline operations.

THERMAL SOLUTIONS

Efficiency. Accuracy. Patient Safety.

Positive patient identification is the foundation of patient safety. From patient admission and throughout the hospital patient care journey, accurately matching the patient to the correct medication, specimen, test and procedure is critical to positive outcomes. PDC Healthcare's thermal wristbands use **bar code technology** to help **prevent human errors**, **improve patient safety** and **enhance workflow**.

⊕ EASY AND VERSATILE

Easy loading and replacement of rolls. Choose the wristband size you need from PDC Healthcare's wide range of thermal bands to fit all sizes of patients, from the smallest newborn babies to the largest adults.

⊕ QUICK & DURABLE

Produce on demand barcoded patient ID in a blink of an eye. Get crisp, fast and durable imprints that maintain effectiveness throughout the patient's full stay.

⊕ CONVENIENT & COMFORTABLE

Easy for caregivers to apply on patients. Light and smooth against the patient's skin.

⊕ EFFICIENT & RELIABLE

Consistently accurate scan reliability improves workflow efficiency, optimizes patient safety and provides convenience for caregivers who can focus more time on caring for their patient.

Desktop direct thermal printer

PDC Healthcare has selected the best world-class desktop printer: this unique printer has been developed specifically to meet the needs of printing wristbands for healthcare patient identification.

Combine our wristbands with the brand new PDC desktop direct thermal printer to produce crisp, accurate bar code imprints on demand.

- Brand new colourful look !
- New PDC branded user-friendly driver
- Easy media loading
- Designed to hold up to 16,5 cm (6,5") outside diameter rolls
- Supports 2,50 cm (1") and 3,80 cm (1,5") core size rolls
- Ethernet and USB 2.0 connectivity standard
- Quick imprint up to 12,50 cm/sec
- Front LC display to provide printer status

LASER PRINTER BANDS

Inspired softness

Discover DuraSoft, a softer laser ID solution inspired by customer demand for a lightweight laser wristband that's **more comfortable for patients and soft enough for even the most delicate skin.**

Practical convenience

Without a stiff, cumbersome laminate overlay, applying DuraSoft to patients is fast and easy, allowing caregivers more time for patient care. DuraSoft **streamlines the admissions process by reducing wait time and increasing workflow efficiency.** And because it's paper-based, DuraSoft works like a dream with your existing laser printer.

EASY AS 1-2-3

1 PRINT

Easy drop-in replacement works with your existing laser printer and format so there's little to no change needed. Jam Free printing in virtually any laser printer.

2 REMOVE

No laminate shields to fold and stick

+ No assembly needed

= Quick & Easy

3 APPLY

Fast and easy application saves nursing and admissions staff time to improve workflow efficiency and allows more time for patient care.

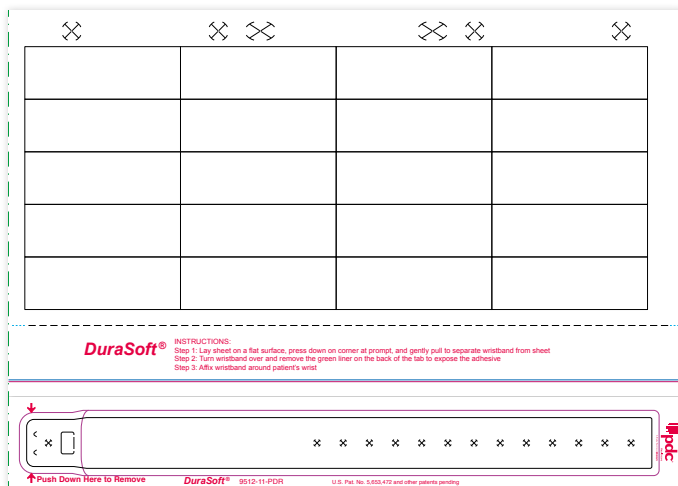

Durasoft

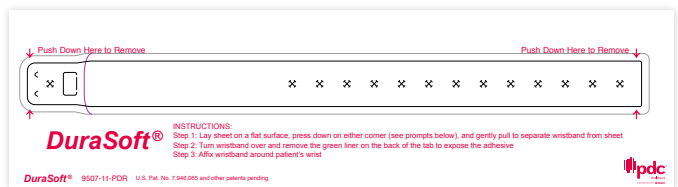

- **Ultra soft and smooth wristband** material provides patient comfort and durability for up to 15 days.
- **Quick and easy application** saves nursing and admissions staff time to improve workflow.
- **Easy drop-in replacement** works with your existing laser printer system and format so there's little to no change required.
- **Patented design** featuring unique cross-cuts provides additional options: 1) Colour-coded alert snaps to identify special risk patients. / 2) Plastic snap closure for additional security.
- **Superior Bar Code Scanning.** Excellent scan rates for linear and 2D bar codes.
- **Moisture-resistant.** Specially designed material resists moisture, alcohol and hand sanitizer to preserve patient data and bar codes. Latex-free and Phthalate-free.
- **Secure, tamper-evident** adhesive closure (also compatible with snap closure).
- **Jam Free printing** with laser printers
- **Standard file holes** make it easy to add the laser sheet to a chart or binder.

LABELBAND

Your existing labels. Empowered

LabelBand wristbands are a safe and secure carrier for patient identification. They are **compatible with your existing labels** and require no investment on equipment.

Resistance and protection

Protect patient data from water, solvents and other abrasives thanks to **LabelBand's clear adhesive shield**. It provides easy and accurate bar codes scanning of both laser and thermal labels.

EASY THREE STEP APPLICATION

1 STICK

Stick your label directly on the wristband.

2 PROTECT

Apply the adhesive shield on the label to protect it.

3 SECURE

Securely fasten the wristband to the patient's wrist thanks to the tamper evident snap closure.

LABELBAND

ADHESIVE SHIELD WRISTBANDS

Sentry LabelBand

- SecurSnap tamper evident closure
- Media supports text, linear and 2D bar codes, photos and graphics
- Clear adhesive shield provides optimal protection from solvents for accurate bar code scanning
- Soft, smooth, non-abrasive material
- Large label area accommodates both laser and coated thermal labels
- Water-resistant, durable and strong, yet lightweight and comfortable

WRITE-ON & INSERT BANDS

The traditional option for patient ID

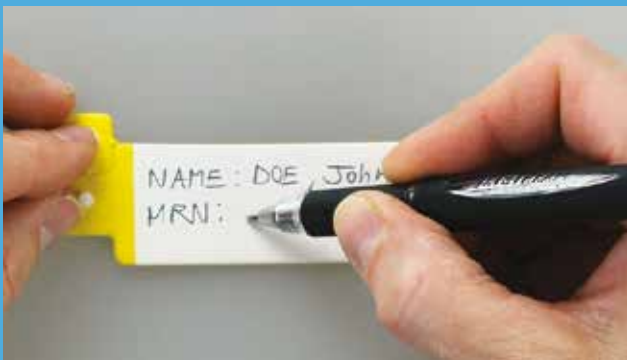

Write on & insert bands offer the **most immediate and easiest solution** to implement a patient identification system in a hospital environment.

While write-on wristbands feature a specially designed ClearImage write-on surface which protects handwritten and embossed information, insert bands feature convenient pockets to protect patient data on insert cards and labels from smearing, wrinkling or scratching.

The largest selection on the market

Choose between over 150 wristbands styles including **multiple materials, different closure types and sizes** that are designed to fit every patient.

Write-on & Insert bands provide medical-grade quality for maximum durability, safety and security.

MOTHER-INFANT

Connecting mother and baby from birth

Maternity departments face the daily challenge of ensuring that **every newborn is properly identified and matched to their mother**, via the unique code on every wristband set.

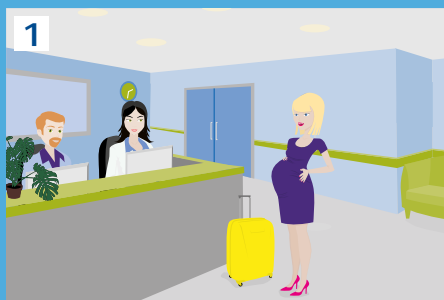

PDC Healthcare offers a complete range of mother-infant wristbands in a large variety of materials and with the widest choice of tamper proof closures, specifically designed for newborns. Choose from our thermal, smooth vinyl or plastic write-on or insert-band ranges, with either adhesive, snap or Snugfit closure.

Wristbands are available in two-part, three-part and four-part designs and feature smooth, soft materials which are **comfortable and safe for sensitive skin**.

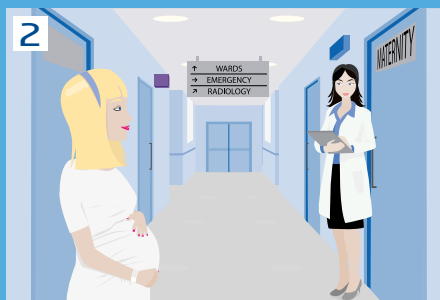

Mother-Infant wristbands provide medical-grade quality for maximum durability, safety and security.

MOTHER-INFANT ID PROCESS

On admission

The medical staff welcomes the mother

After the admissions process, the mother can access the delivery room with her admissions wristband

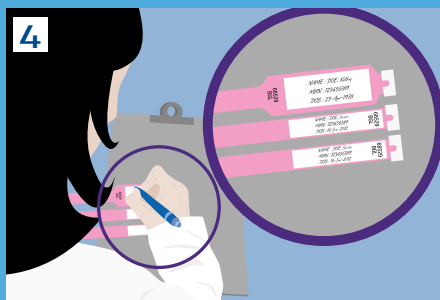

Refer to the "Mother-Infant" module in "The Patient Safety Program" for more information.

In the delivery room

Both's identifiers are correctly created and matched before the birth

Two wristbands are generated for the baby and one for the mother

The nurse and the gynaecologist are asked to validate wristbands

Wristbands are applied on the baby and on the mother

The mother and the infant are brought to their room

The mother and the infant are discharged

Soft thermal – Adhesive closure

TenderCare thermal mother-infant 2-Part

- Exclusive, patent-pending 2-part & 4-part wristband system positively identifies baby with mother
- The surface provides best imprint quality, maximum resistance to solvents and seamless printing
- Provides fast, accurate, on-demand printing with a thermal printer
- Supports text, linear and 2D bar codes, photo ID and graphics
- Helps increase lifespan of print head
- Ensures crisp, clear bar codes for easy scannability
- Ultra-soft material for delicate newborn skin
- Tamper-resistant adhesive closure
- Offered in plain white, plus a variety of cute, baby-friendly designs

PEDIATRIC

ID wristbands designed for even the most delicate of skins

There is no surprise that babies and infants' skins are more delicate than adults'. Baby's skin is 30% thinner and less resilient, it absorbs and loses moisture more quickly than adult skin. External irritants penetrate infant skin more easily as the barrier is not yet fully developed and friction make it easier for baby's skin to become irritated.

That's why PDC Healthcare has developed a **specific range of pediatric wristbands** to correctly identify infants and children.

PDC Healthcare offers a complete range of pediatric wristbands in a large variety of materials and with the widest choice of either reusable or tamper evident closures, specifically designed for newborns. Choose from our thermal, smooth vinyl or plastic write-on or insert-bands ranges, with either adhesive, snap, Velcro or Snugfit closure.

Pediatric wristbands

Infant direct thermal wristbands provide positive patient identification for newborns using bar code technology to help ensure patient safety.

- The surface provides best imprint quality, maximum resistance to solvents and seamless printing
- Provides a flat surface for best bar code scanning results, eliminating curvature issues
- Improved direct thermal surface protects print & bar code from water, soap and hand sanitizer
- Easy to apply adhesive closure ensures safety and security

Specialty wristbands

KangaBand for use with Broselow system

The Broselow System is an easy-to-use, colour-coded information and reference kit that provides doctors and nurses with the proper equipment sizes, pre-calculated medication dosages and infusion rates needed to perform resuscitation on a child according to weight.

- Available in 9 colours that coordinate with the Broselow System
- Write-on style wristbands feature a designated area to write in patient's weight (in Kg)
- Colour-coded for quick, visual identification. Colour name is also spelled out for additional reinforcement
- One size fits all. Fully adjustable
- Playful kangaroo design for pediatric patients
- Features patented SecurSnap, tamperproof closure for added security

SHORT-STAY

Shorter stay? No compromise on patient safety !

Short-term hospital applications such as the emergency room and same-day surgery require patient identification that is accurate, reliable, economical and efficient for busy, fast-paced environments. PDC Healthcare Short Stay wristbands are the perfect fit for departments with these requirements.

Short Stay Wristbands are **quick and easy solution to implement** ; they feature Tyvek untearable paper material and an adhesive tamper evident closure to prevent wristband transfer.

Short Stay LabelBand

- Media supports text, linear and 2D bar codes, photos and graphics
- Clear adhesive shield provides optimal protection from solvents for accurate bar code scanning
- Soft, smooth, non-abrasive material
- Tough Tyvek material is water-resistant, durable and strong, yet lightweight and comfortable
- Non-transferable, tamper-evident adhesive closure

COLOUR-CODED ALERTS

Communicate awareness of patient's medical conditions

To increase patient safety, many healthcare associations such as The AHA (American Hospitals Association) and The NHS (National Health Service in the UK) encourage a standardised use of pre-printed colour-coded alerts on all patients with specific requirements*.

PDC Healthcare colour-coded alerts **improve patient safety by informing medical staff about patient's special medical needs**. Colour-coded alerts can be used in addition to patient ID wristbands.

PDC Healthcare offers **a large range of products including colour-coded alert wristbands, snaps and labels**. The most common risks are pre-printed in text to maximize patient safety and all risks are customisable in your own language.

THE ID PROCESS

On admission

1 The admissions nurse asks the patient about any known risk

2 The nurse produces and applies an additional colour coded wristband

3 The nurse clearly documents the risk in the patient health record

At any time during the hospital stay (wards/or)

4 The medical staff looks for any colour coded wristband on the patient's wrist

5 The medical staff checks the colour coded wristband against the patient medical record

6 The medical staff should constantly monitor the patient in order to understand if a new risk is occurring

On discharge/transfer into another ward/hospital

7 The nurse clearly documents the risk in the patient health record

8 The patient is transferred wearing the colour coded wristband(s) or discharged

Refer to the "Colour coded wristbands" module in "The Patient Safety Program" for more information.

*The colour coded wristband system may vary in different countries.

Alert bands

Sentry SuperBand Alert Bands

PDC Healthcare's Sentry SuperBand Alert Bands are constructed of lightweight, non-stretch polyester with a patented SecurSnap closure for maximum security.

- Extra large text provides clarification to clinicians (assisting in dim light conditions or for those who are colour blind)
- Only primary and secondary colours used as indicators
- Custom imprints & cues can be used to communicate less common conditions
- Custom imprinting in your national language upon request

COLOUR-CODED ALERTS

ALERT SNAPS

Alert snaps

Ident-Alert colour-coded snaps

- Provide convenience by allowing caregivers to classify multiple patient conditions – all on one PDC Healthcare wristband
- Soft, flexible material with rounded edges for patient comfort
- Enhance patient safety with large, easy-to-read text that identifies at-risk patients
- Locking SecurSnap safety feature prevents transfer of alert to another patient
- If there is a change in a patient's condition, the Ident-Alert Snap can be removed using safety scissors without destroying the admitting wristband
- Blank and customisation in your national language available

Step 1

Push snap and peel out of carrier.

Step 2

Place stud side of snap through hole in ID band.

Step 3

Fold snap up to securely close.

Best if used with Compuband adult/pediatric direct thermal, Veri-Color, Sentry Superband, SpeediPrint, Sentry LabelBand

BLOOD BANDS

Improve efficiency while ensuring safe blood transfusions

Your hospital has invested time and resources to deliver superior patient care. **Yet just one patient or blood misidentification error can have serious or even fatal consequences**, particularly when a hemolytic response occurs due to an incompatible transfusion.

PDC Healthcare understands the critical role of positive identification during blood transfusion and provides a **unique range of blood bands to help you accurately match the right patient to the right blood every time.**

PDC Healthcare's blood bands provide unrivaled medical-grade quality to help you ensure **maximum safety throughout the blood transfusion process.**

THE ID PROCESS

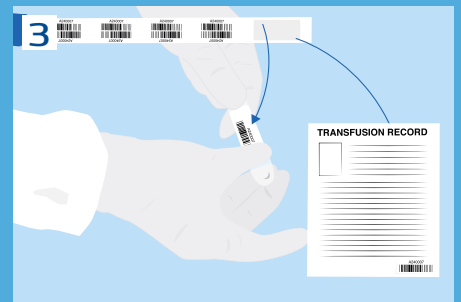

The blood sample

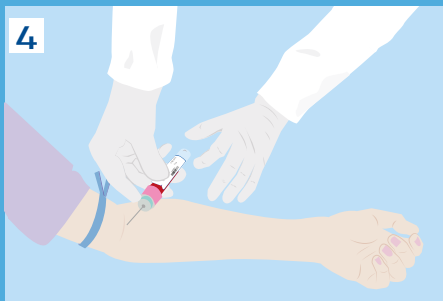

The nurse checks the patient identification wristband against the transfusion record.

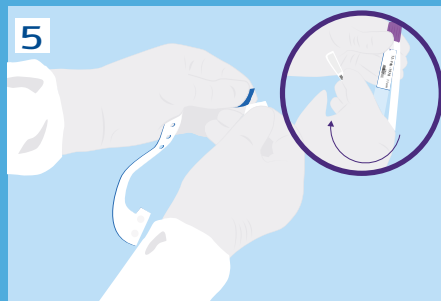

The nurse removes the wristband label filled with patient identifiers and applies it to the first draw tube.

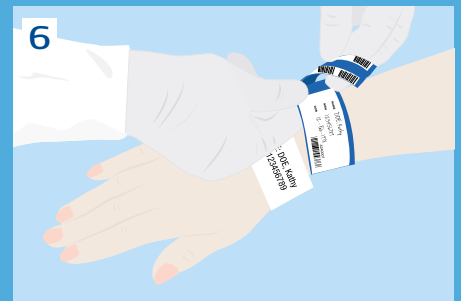

The nurse removes matching labels and places them on each additional draw tube and on the patient medical record.

The nurse draws the patient blood.

The nurse separates the tail from the wristband and applies it to the first draw tube.

The nurse applies the blood band on the patient.

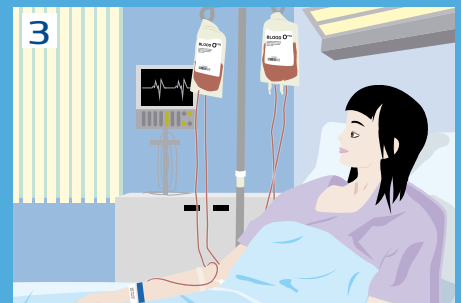

The transfusion

The nurse checks the blood bags against the transfusion record number and the blood band on the patient by scanning the patient wristband and the barcode label on the blood bag.

A double check is performed by another nurse.

The nurse can perform the transfusion.

Refer to the "Blood bank" module in "The Patient Safety Program" for more information.

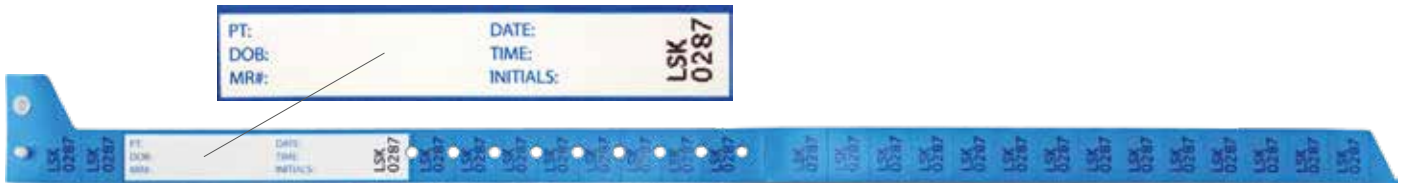

Write-on blood bands

Securline Blood Band Plus

The top wristband choice of hospitals and blood centers to reduce misidentification errors while increasing patient comfort and safety, Securline Blood Band Plus is an easy to implement write-on solution requiring no IT involvement nor capital investment.

- Removable, write-on, patient information label to stick on the first draw tube
- Easy-to-read patient information area: the large, white, carbon-copy surface offers clear and easy readability
- Includes 23 easy-peel matching labels to place on each additional draw tube and on the patient medical record (more than any other blood band style)
- Adhesive pull off tail applies directly to draw tubes
- Patented SecurSnap closure prevents transfer and tampering
- Each box includes one Xtender Band for larger patients (Also sold separately. See below.)

Product number	Size of wristband	Bands/Box	**Colours
2407-**-PDB	43,2 cm	150 bands (15 dispenser boxes of 10 bands each)	<div>14</div> <div>16</div> <div>22</div> <div>67</div>

BLOOD BANDS

BAR CODE BLOOD BANDS

Securline Bar Code Blood Bands

Using bar code technology satisfies The Joint Commission's requirements for a one-person verification process. Bar codes help prevent misidentification caused by human error and provide greater workflow efficiency to allow caregivers more time for patient care.

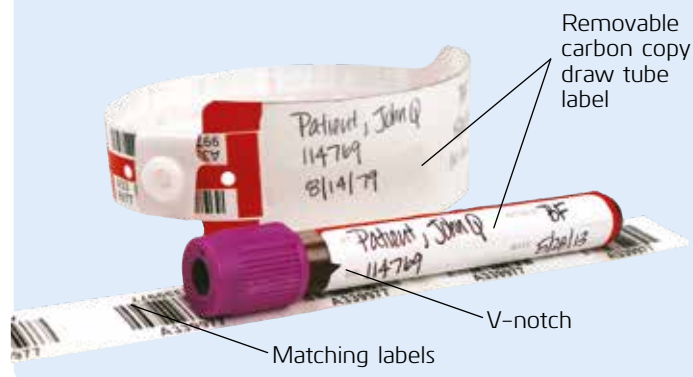

With serialised bar code ID and alpha-numeric codes, Securline Bar Code Blood Bands accurately match the right patient to the right blood, ensuring maximum safety throughout the blood transfusion process.

Positive ID
Throughout
the Entire
Process

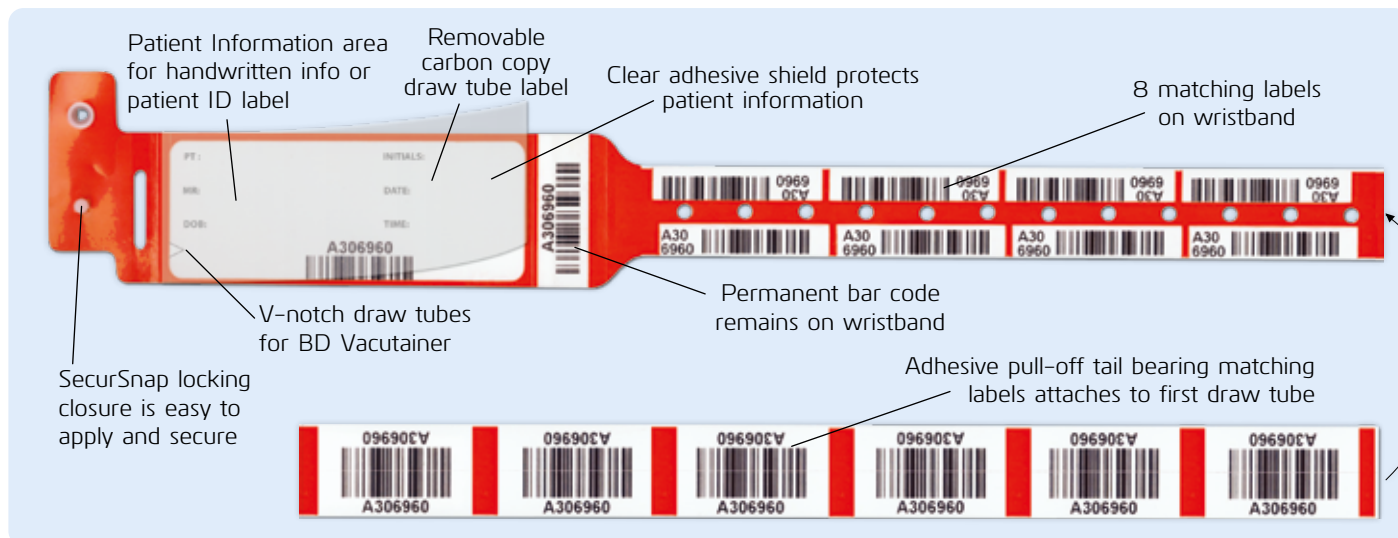

Place the patient ID label on the first draw tube and place matching labels on additional draw tubes, transfusion order, patient medical record, according to your specific protocol:

- Patented dual-purpose hybrid style wristbands let you handwrite patient information or use your existing LIS labels
- Integrates seamlessly with your existing blood bank system. No IT involvement or capital investment
- Clear adhesive shield and advanced material resist moisture and protect patient information and bar code from fluids, solvents, alcohol and hand sanitizer
- V-Notch on patient ID label ensures proper placement on BD Vacutainer for accurate bar code scanning and visibility of tube colour

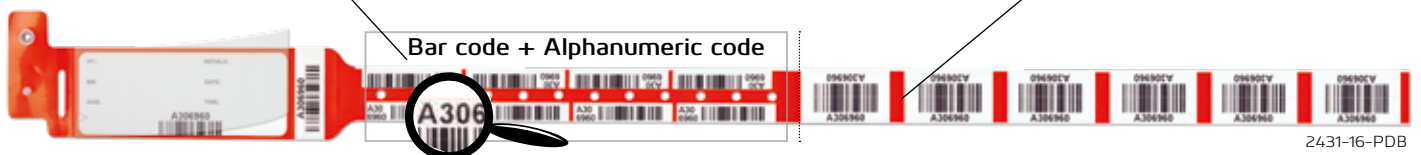

- Adhesive pull-off tail bearing matching labels directly applies on the draw tube
- SecurSnap locking closure is easy to apply and secure
- Reattachable with single-post snap
- Designed for inpatient or outpatient use

BLOOD BANDS

BAR CODE BLOOD BANDS

Securline VeriDigit Bar Code Blood Bands

NEW

The Securline VeriDigit Blood Band is specially designed to support the Cerner Bridge Transfusion Administration system. **VeriDigit** helps ensure positive patient identification prior to transfusion at the patient's bedside.

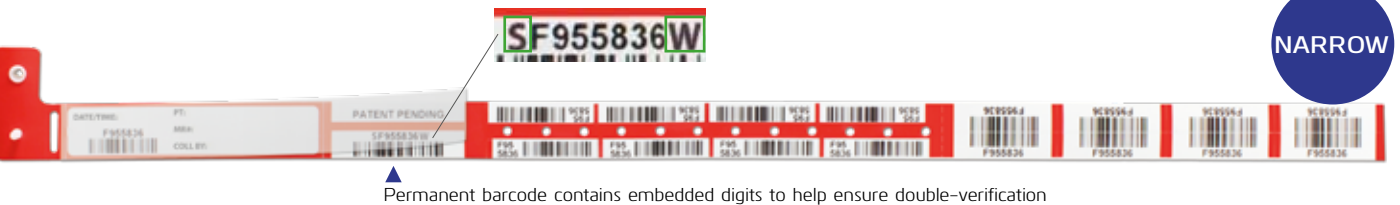

If any other blood bank ID bar code is scanned, such as a bar code sticker from the patient's chart or transfusion order, the **Bridge system** issues an alert.

- Securline VeriDigit wristband features a special permanent bar code that must be scanned by the transfusionist as part of the Cerner Bridge Transfusion Administration workflow
- The permanent bar code ID on the wristband contains an embedded prefix and suffix code when scanned, ensuring staff verified the patient at bedside
- Large, easy-to-read blood bank ID numbers and crisp bar codes
- GS1-128 bar coding symbology
- Adhesive pull-off tail with matching bar code labels applies directly to draw tubes
- Reattachable using our Single-Post Snap 8615-00-PDJ

RFID

The future in patient ID

PDC Healthcare's Smart Band Radio Frequency ID (RFID) Wristbands provide the **most powerful and accurate technology to identify and connect patients**, staff, equipment, location and procedures for efficiency, cost savings and patient safety.

Smart Band RFID Wristbands contain a microchip and antenna with a unique identifier, allowing information to be written and retrieved by RFID scanners at any time. Patient information can be instantly accessed on all devices and applications in proximity – no need to scan – while data is stored for downstream analysis including billing, process improvement and infection surveillance.

Advantages:

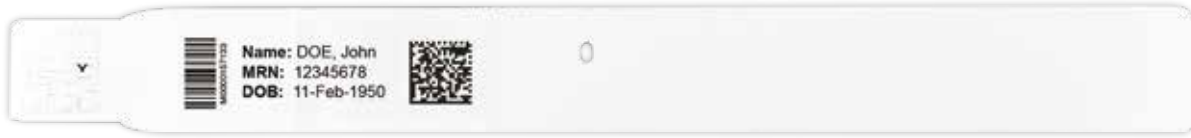

- ⊕ RFID yield **longer read distances and faster processing times** over bar code, saving precious time for caregivers who have to perform the essential task of positively identifying patients hundreds of times every day.
- ⊕ RFID tags reach **higher first time read rates** than bar codes. Factors such as reader orientation or wristband curvature have minimal impact on the read rate for RFID tags, where they can greatly impact bar code read rates.
- ⊕ RFID does not require line-of-sight data transmission, so tags can be read through and around the human body, clothing, bed coverings and any non-metallic material. This enables the caregiver to **scan the wristband from a distance without disturbing the patient**.
- ⊕ RFID tags are **longer lasting**. Where scratches or smearing on bar codes can make them impossible to read after some time, time has little to no impact on read rates for RFID tags which are embedded inside the wristband and hence protected from light, frictions and fluids.
- ⊕ RFID provides **increased security** over bar codes, which are easy to copy and duplicate.
- ⊕ RFID tags are **dynamic data carriers**, enabling updates to the encoded data at any time, where bar codes would require to be reprinted.
- ⊕ RFID tags also yield **larger memory capacities**.

Thermal RFID bands

Smart ScanBand

- Direct thermal Smart wristbands feature an RFID transponder and direct thermal print surface for on-demand printing and encoding
- Various inlay types available
- Tamper-evident adhesive closure

ADHESIVE CLOSURE

Product number	Inlay	ISO #	Size of wristband	Information area	Core size	Outer diameter	Bands/Box	Colour

Labeling solutions

We all know healthcare is changing, but the need to communicate effectively remains the same. Whether it's in a critical care ward, fracture clinic, doctor's office or lab, PDC Healthcare have a suitable label and tape solution to meet your needs. Our know-how and quality processes mean you don't have to waste valuable time "experimenting" with products that might not work for your application. We offer thousands of stock pre-printed and print-on-demand products to choose from. If we don't stock it, custom labels and tapes can be created to meet your exact specifications.

With 60 years of experience, PDC Healthcare provides the largest selection of accurate, reliable and easy to use labels and tapes for every kind of hospital department and environment. Our labeling solutions accurately identify drugs and stock items. They match the strict conditions and regulations of a healthcare environment and work in sync with the new technologies that are part of a modern healthcare system.

ANESTHESIA LABELS & TAPES

Meet critical Patient Safety & Regulatory Guidelines with accurate medication labeling

PDC Healthcare's Anesthesia Labels & Tapes help **prevent medication errors caused by the use of unlabeled or mislabeled medications and other procedural breakdowns that can have a fatal impact on patients.** Safe medication practices are critical to patient safety and preventing adverse drug events.

PDC Healthcare's Anesthesia Labels & Tapes provide accurate medication identification that meets specific international guidelines and regulatory requirements. ASTM standardised colours, drug classifications and required identification fields help caregivers correctly communicate injectable medications to prevent confusion or mistakes in administration.

ANESTHESIA LABELS & TAPES

DRUG CLASSES & SPECIFICATIONS

PDC Healthcare offers labels and tapes for all the main drug classes using ASTM specified colours for Drug Classes (ASTM D4774)

Drug class	Colour	Example
Anticholinergic Agents	Green	
Benzodiazepines	Orange	
Hypotensive Agents	Stripes white/ violet	
Induction Agents	Yellow	
Local Anesthetics	Grey	
Major Tranquilisers	Salmon	

Drug class	Colour	Example
Muscle Relaxants	Fluo Red	
Narcotic antagonists	Stripes white/ blue	
Narcotics	Blue	
Relaxant antagonists	Stripes white/ fluo red	
Vasopressors	Violet	
Miscellaneous	White

MULTI-PURPOSE TAPES & DISPENSERS

Medical tapes that won't let you down !

PDC Healthcare offers an extensive line of tapes designed for use in every healthcare department and in the harshest environment's including tapes that are **glove friendly, yet stick tightly to a wide variety of flat or curved surfaces**. Our medical tape line maintains **superior readability and is durable, tough and resistant** to chemicals, abrasion and moisture; tapes are able to withstand repeated cycles of cryogenic conditions and autoclaving.

From patient identification to pharmaceutical, laboratory testing, autoclave and sterilization, as well as freezer storage and hot water baths, we have a medical product line of tapes that will meet your compliance regulations.

Choose from a large selection of label and tape dispensers to **organize your stock and allow your staff to quickly find** what they need, when it really counts.

Time Tape

TimeTape is the **toughest, most reliable labeling tape** in the industry. This strong, coated paper tape is oil, water and acid resistant. It will withstand temperatures from -23°C to $+121^{\circ}\text{C}$ and has an application temperature as low as 0°C . It **can be written on with a pen, pencil, or permanent marker and has a removable adhesive**.

MULTI PURPOSE TAPES

AUTOCLAVABLE

Autoclave indicator tape

This PDC Healthcare indicator tape is specially designed for autoclaving. Stripes appear after 15 minutes of exposure in a steam autoclave set for 121°C. Advanced adhesive ensures easy application, strong adhesion and clean removal from the autoclaved items. Made of strong crepe-embossed paper with special coating that helps prevent permanent ink smudging. Latex-free.

Stripes turn from white to black after processing.

Product number	Tape width	Tape length	Core size
TSI-512-2	1,3 cm	12,7 m	2,5 cm
TSI-534-2	1,9 cm		
TSI-501-2	2,5 cm		
TSI-1260-STR2	1,3 cm	54,8 m	7,6 cm
TSI-3460-STR2	1,9 cm		
TSI-160-STR2	2,5 cm		

Hi-Lo Temp tape

This product can withstand temperatures as high as +288°C and as low as -232°C. This unique self adhesive tape can be subjected to a large variety of testing equipment such as ovens, sterilisers and incubators. Hi-Lo Tape combines great strength with durability and has a textured surface that can be stamped or written on with a carbon pencil.

Product number	Tape width	Core size	Material/Adhesive	Roll size
AT-312	1,3 cm	2,5 cm	Temp Tape/Permanent	1,3 cm x 762 cm
AT-334	1,9 cm			1,9 cm x 762 cm
AT-301	2,5 cm			2,5 cm x 762 cm

Label dispensers

Mission Statement

PDC connects people, products and technology through innovative ID solutions that deliver superior customer experiences worldwide.

Quality Process = Quality Care

Every company talks about quality. But not every company makes the kind of investments in people, process improvement and technology that PDC Healthcare does to ensure unmatched quality in all that we do.

As part of our mission to provide defect-free, medical-grade quality products, every product we produce is born of thousands of hours of rigorous research and testing to provide the most durable, reliable, safest and highest-performing products available.

In addition, our company constantly strives to understand our customers' needs through vehicles such as our comprehensive Customer Survey Program. Through close and continuous interaction between customer and company, we can better ensure that your needs and views are clearly understood and fulfilled.

That's been the PDC Healthcare way for more than 60 years.
